- ❖ Integration Facebook, LinkedIn, Google services (Social networks using eAuth).
- ❖ Load Testing and Bulk data upload using Stress Stimulus and JsFiddler.

PublicHealth:

eCareAgora Public Health platform serves as a Repository of all Health Programs in India. It provides a Search Engine for Easy Discovery of these Health Programs. It spreads awareness and empowers citizens to take informed decision on these Health programs using a variety of Tools and Self Assessment questionnaires. It provides a 'Push' of these Health programs to users, by recommending the most matching programs, using an intelligent analytics engine which does the best match between user profile, location and programs. In addition to providing easy discovery of Health programs, 'eCareAgora Public Health' aims to promote a health seeking approach towards preventive care and early disease detection. eCareAgora aims at promotion of preventive care and early diagnostics, along with dissemination of information to improve community health at large. The entire solution is developed using interactive communication technologies (ICT) having the potential to reach large populations, with programs, content and risk assessment tailored to specific needs of communities, groups and individuals. It is an innovative, scalable business that has IT and Analytics as the core enabler of the business.

Features:-

- ❖ 'Risk Factors' - Both personal and epidemiological risk factors used to suggest suitable health programs

- ❖ 'Health Risk Assessments' - Questionnaires on risk factors for common diseases and conditions predict the likely chance to develop a condition, much before the actual symptoms develop, leading to evidence-based preventive care
- ❖ 'Routine Tests' - Recommended diagnostics tests (laboratory/imaging) for various age categories and risk factors
- ❖ Data management using mongoDB
- ❖ Push notifications

B2BCommerece:

Businesses across 10+ Health categories need to buy and sell raw materials, consumables, supplies and finished products. A B2B eCommerce Marketplace is required, which facilitates easy discovery, trade and collaboration among Health businesses. Diagnostics & Treatment materials for the under-privileged need proper channels to reach the target segments

eCareAgora Discovery

Search and Locate Healthcare Businesses and Health Programs matching customers unique needs and location. Discovery of Health Providers and Programs was simple. Collection of a wide variety of Health Programs. A Repository of Emergency and Public services. Easy-to-use Search feature based on a variety of filters and location. Boosts the discoverability of healthcare providers and programs

- ❖ 'Program Discovery' - Search for screening, preventive care, promotional, mobile diagnostics & care programs
- ❖ 'Provider Discovery' - Locate Healthcare organizations across 15 categories, either for business or for consumer healthcare services
